

- On request it's possible to mount a glazing window on fire proof doors.
- The glasses are fire proofing certified REI, composed by several stratum of float glass and special transparent gel that, in case of fire, becomes blind and gives out a refreshing steam.
- Glasses are fixed by metal profiles clipped on hidden screws, rubber gasket which avoid the growth of the glass at high temperature.
- We provide standard and, on request, special sizes.

NOTES:

- We recommend the door closer in case of frequent usage and glass bigger than mm. 300*400.
- Glass is delivered pre-mounted.
- If in direct contact to sun and water, fire proof glass is liable to deteriorate.
- Glass could have micro bubbles, which are not questionable if invisible at more than 3 meters.

STANDARD GLAZING			
GLAZING MIDDLE SIZE HEIGHT (HO)	GLAZING SIZE (B nomin. + H nomin.)	NET LIGHT GLAZING SIZE (LNVxHNV)	EXTERNAL PROFILE SIZE (LFxHF)
1600	300x400	270x370	350x450
1500	400x600	370x570	450x700

PS: sizes are expressed in mm.
